- Tsunami Mikenna Commercial running in Guam Community College Campus and University of Guam Campus.

BE TSUNAMI READY GUAM!

TSUNAMI EVACUATION ROUTE

WHAT TO KNOW

Tsunamis:
A series of waves generated by a sudden change of the ocean's water level, most often caused by earthquakes, but also by landslides, and volcanic eruptions.

A Tsunami:

- is like a fast-rising flood and strikes with overwhelming force.
- Moves faster than you can run.
- is a series of waves that may continue for hours. The first wave may not be the last or the strongest.

Warning Signs:

- A strong earthquake.
- A sudden rise or fall of the ocean tide.
- A loud roaring sound coming from the ocean.

WHAT TO DO

- **DROP, COVER, AND HOLD ON** until the earthquake is over; protect yourself.
- **MOVE IMMEDIATELY INLAND TO HIGHER GROUND** and away from low-lying and coastal areas.
- **FOLLOW EVACUATION ROUTE SIGNS** that lead to higher ground.
- **DO NOT WAIT** for an official warning.
- **GO UP TO THE 3RD FLOOR OR HIGHER** of a concrete reinforced building.
- **DO NOT PACK or delay.**
- **DO NOT RETURN to the beach** - large waves may continue to come on shore for several hours.
- **WAIT** for an "all clear" from local emergency officials before returning to coastal areas.

TSUNAMI BAG

Assemble emergency supply kits with at least a 10-day supply for each family member.

- Non-perishable foods and manual can opener
- Water
- Battery-powered radio
- Batteries
- Flashlight
- Candles and matches
- Portable eye care
- Village map showing evacuation routes and assembly areas
- Cash
- First Aid kit
- Extra copies of insurance papers, list of prescriptions, and family health records
- Prescription and non-prescription medicines

FOR MORE INFORMATION VISIT GHS.GUAM.GOV

www.ghs.guam.gov

Guam Tsunami Program

- Currently planning for the development and production of outreach materials and media campaign on the alert notification and warning of Guam's All Hazards Alert Warning System.
- Planning for a Village Evacuation along Guam's Southern Coastal Area.

TSUNAMI EVACUATION MAPS

IF YOU FEEL A STRONG EARTHQUAKE:

- Drop, Cover, and Hold On
- When the shaking stops, move to safe zone
- DO NOT wait for an official warning
- Stay away from coastal areas until officials issue an "all clear"

A local tsunami can arrive in 15 to 20 minutes!

Safe Zone

Proceed to this area for all tsunami warnings or if you feel a strong earthquake.

Evacuation Zone

Evacuate from this area for all tsunami warnings or if you feel a strong earthquake. Move inland and to higher ground or proceed to the 3rd floor or higher of a tall reinforced concrete building.
