

Tsunami Modeling and Mapping: Guidelines and Best Practices

The document you are looking for *Guidelines and Best Practices to Establish Areas of Tsunami Inundation for Non-modeled or Low-hazard Regions* has been retitled and reformatted as part of the “Tsunami Modeling and Mapping: Guidelines and Best Practices” series in September 2016.

The new title is *Tsunami Inundation Determination for Non-Modeled Regions*.

Note: No significant changes to the content were made, but it is currently out for review.

All the documents in the “Tsunami Modeling and Mapping: Guidelines and Best Practices” series are available on the NTHMP website at <http://nws.weather.gov/nthmp/publications.html>. The series consists of:

- Part I: *Tsunami Inundation Modeling*
- Part II: *Tsunami Inundation Maps*
- Part III: *Tsunami Inundation Determination for Non-Modeled Regions*
- Part IV: *Tsunami Evacuation Maps*
- *Checklist for Tsunami Modeling and Mapping Reports and/or Metadata*
