• All Puerto Rico was recognized as TsunamiReady: 46 communities. Nine (10) champions

• Six TsunamiReady supporters:
  • Hotel Marriot, San Juan
  • Hotel La Jamaca, Lajas
  • Costa Salud - Health Center, Rincón
  • Econo Super Market, Rincón
  • Vacacional Center Villas de Añasco
  • Hotel Villa Cofresi, Rincón

• Fifteen communities renewed their TsunamiReady recognition.

• Two island wide workshops:
  1. Emergency managers and tsunami warning focal points personnel to train them on TWC messages and products.
  2. Tsunami Media Kit
  3. Ongoing Workshop for the maritime and tourist communities

• Two hundred forty-five (245) tsunami signs were replaced or installed, including 12 poster size signs

• Organize and participate in educational events throughout Puerto Rico at schools, local, state and federal government agencies, faith based organizations, industry, among others. More than 13,000 citizens were impacted directly

• Keep the TsunamiReady inventories up to date (on line).

• Thousands of tsunami related materials were distributed, including flyers, brochures and booklets, safety rules card, media kits and pencils and tsunami evacuation maps (thousands)
Priority #2: Threat and hazard assessments

- Pedestrian analysis for four cities
- Currents analysis for ports of San Juan, Ponce and Mayaguez (ongoing: Fajardo and Salinas)
- Tsunami Decision Support Tool (TDST)
- Maritime community advise from modeling: 100 fathoms (local), 50 fathoms (teletsunamis)
Priority #3: NTHMP support to Coordinating Committee and Subcommittees

- NTHMP support to Coordinating Committee (CC) and Subcommittees (MES, MMS, WCS)
- Support to CaribeWave, the TsunamiZone.org and tsunami preparedness campaigns conference calls.

Priority #4: Creating a Community-based Culture of Tsunami Preparedness and Response

- Support to the annual national Tsunami Preparedness week via the local coordination of the CARIBE WAVE and tsunami related activities.
- Encourage and help local warning points to fully participate in the monthly NTWC communication test and local test procedures (100%).
- Maintain alive the local warning dissemination capabilities to people at risk via the maintenance, update and repair of the EMWIN systems currently installed in the warning points (48).

Priority #5: Tsunami outreach efforts to all audiences.

- Promote the effective and reliable tsunami outreach efforts to all audiences via the dissemination of island wide tsunami audio clips. four 30 seconds long, daily radio spots
- EAS Activation (CaribeWave and Shakeout)
- Local monthly tsunami test (less than 10%)

Priority #6: Improving Tsunami Warning Criteria

- Landslide tsunami?
1: State and Local TsunamiReady Program maintenance and implementation
   • Help and support 16 communities in the renewal process.
   • Identify and help four additional TsunamiReady supporters
   • Organize a workshop for emergency personnel first responders to train them about the NWS enhanced tsunami products, the Puerto Rico tsunami protocol, response plans and alert criteria
   • Keep updated the PR tsunami media toolkit (TMTK) and the Tsunami Decision Support Tool (TDST) and coordinate a workshop for the media
   • Organize and participate in educational events throughout Puerto Rico at schools, local, state and federal government agencies, faith based organizations, industry, etc. (keep the developed tsunami curriculum documents updated and online)
   • Keep the TsunamiReady inventories and web sites up to date

2: Threat and hazard assessments
   • Extend the currents analysis for the ports of Arecibo and the Guánica
   • Tsunami evacuation pedestrian analysis for four more communities.
   • Study the regional tsunami potential from volcanic sources. As a pilot, the tsunami potential from the Kick ‘em Jenny volcano will be studied

3: NTHMP support to Coordinating Committee and Subcommittees
   • The PR TsunamiReady team will fully support and participate in the NTHMP activities, meetings and sharing of NTHMP related products and best practices.

4: Creating a Community-based Culture of Tsunami Preparedness and Response
   • Continue the support for the annual national Tsunami Preparedness week via the local coordination of the CARIBE WAVE exercise. Full exercise as part of centenary of the 1918 earthquake and tsunami event
   • Encourage and help local warning points to fully participate in the monthly NTWC communication test and local test procedures
   • Maintain the local warning dissemination capabilities to people at risk via the maintenance, update, and repair of the EMWIN systems currently installed in the warning points

5: Tsunami outreach efforts to all audiences.
   • Promote effective and reliable tsunami outreach efforts to all audiences via the dissemination of island wide tsunami audio clips

6: Improving Tsunami Warning Criteria
   • Landslides
   • Coordinate a local activity during the World Tsunami Awareness Day (WTAD)
